DETAILED ACTION

1. Claims 1-6 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically regarding claims 1 and 5, the use of parenthesis renders the claim indefinite because it is unclear whether the limitation(s) within the parenthesis are part of the claimed invention. See MPEP § 2173.05(d). Also, regarding claim 5, the recitation of the limitation "(FERM BP-7032)" lacks sufficient antecedent basis for this limitation in the claim. Also, it is unclear whether applicant's are claiming a peroxidase enzyme derived from *Geotrichum candidum* Dec 1 FERM BP-7033 as recited in claim 1 or a peroxidase enzyme derived from *Geotrichum candidum* Dec 1 FERM BP-7032 as recited in claim 5.

Allowable Subject Matter

4. Claims 2-4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art of record do not specifically teach a peroxidase enzyme derived from *Geotrichum candidum* and further, do not specifically teach SEQ ID NO:7 and SEQ ID NO:8 as recited by the instant

claims. The closest prior art of record is Svendsen et al. (US 5,976,855). Svendsen et al. teach a lipolytic enzyme derived from *Geotrichum candidum* for use in detergent compositions for stain removal. It would not have been obvious, to one of ordinary skill in the art, to formulate a peroxidase enzyme from *Geotrichum candidum* Dec 1 FERM BP-7033 having the properties as recited by the instant claims, because the teachings of Svendsen et al. illustrate a method of preparing a variant of a lipolytic enzyme.

5. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Remaining references cited but not relied upon are considered to be cumulative to or less pertinent than those relied upon or discussed above.

Applicant is reminded that any evidence to be presented in accordance with 37 CFR 1.131 or 1.132 should be submitted before final rejection in order to be considered timely.
